

INISSION Compliance policy for REACH and RoHS

REACH Regulation (EC) No 1907/2006 on the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) and setting up a European Chemicals Agency provides a comprehensive legislative framework for chemicals manufacture and use in Europe. The legislation applies to all chemical substances: manufactured, imported, sold, used on their own, in mixtures or in products.

INISSION is committed to complying with all regulatory requirements applicable to our business. Under REACH, **INISSION** has identified the following provisions as particularly relevant for the products we supply:

REACH restrictions in Annex XVII – Annex XVII lays down restrictions on the manufacture, placing on the market and use of certain dangerous chemical substances, mixtures and articles. More information on Annex XVII and the list of restrictions can be found on the European Chemical Agency's (ECHA) webpage.

REACH Substances of very high concern (SVHC) and information on substances in articles (art 33) – Certain substances have hazardous properties that have serious consequences for human health and the environment. Substances fulfilling the criteria for SVHC classification can be placed on the Candidate list, an official list maintained by ECHA. Substances are continuously added to this list, presently two times per year.

If an article contains more than 0,1 % (weight by weight) of a substance on the Candidate list we as supplier are under a legal obligation to give you as recipient of an article sufficient information to allow safe use of the article including, as a minimum, the name of that substance. This information shall be given even if not requested.

More information on information on substances in articles and the latest version of the Candidate list can be found on ECHA's webpage.

RoHS stands for Restriction of Hazardous Substances, and impacts the entire electronics industry and many electrical products as well.

RoHS specifies maximum levels for the following 10 restricted substances. The first six applied to the original RoHS while the last four were added under RoHS 3.

Lead (Pb): < 1000 ppm
Mercury (Hg): < 100 ppm
Cadmium (Cd): < 100 ppm
Hexavalent Chromium: (Cr VI) < 1000 ppm
Polybrominated Biphenyls (PBB): < 1000 ppm
Polybrominated Diphenyl Ethers (PBDE): < 1000 ppm
Bis(2-Ethylhexyl) phthalate (DEHP): < 1000 ppm
Benzyl butyl phthalate (BBP): < 1000 ppm
Dibutyl phthalate (DBP): < 1000 ppm
Diisobutyl phthalate (DIBP): < 1000 ppm

INISSION POLICY

To achieve and maintaining compliance with REACH and RoHS for production of existing and new products is based on the following:

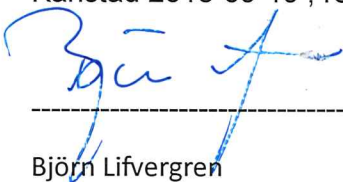

- We actively work with our supply chain to ensure that all materials and components used comply with the REACH requirements.
- As corrective and preventive action will we immediately take any necessary corrective actions in case of suspicion of non-compliance with REACH or RoHS.
- We ensure continuously that our production processes meet requirements in RoHS directive.
- Together with our suppliers and customers we continuously following modifications and amendments of the REACH regulation to ensure compliance with the latest applicable version.

Where our customers specify items and supplier to be used for the manufacture of their products we will rely on the customer to ensure that the selected items are compliant with REACH, including whether it contains SVHC above the regulatory limit triggering information requirements, unless otherwise agreed.

If our customer need a more detailed analyze can INISSION offer this as a service.
